SO. PACIFIC THE ISSUE

Interest of Market Yesterday Centered Largely in This Stock.

SPECULATION IN PACIFICS

Day Closed With Falling Off of Dealings, Making the Day Dullest of Week.

(By Associated Press.) NEW YORK, June 17.—Interest in the stock market to-day remained largely centered in the Southern Pacific preferred entered in the Southern Pacific preserved Stock Issues. This plan was diligently convassed from every point of view. There was considerable speculative ac-tivity in Union Pacific and Southern Pa-elfic as a consequence. The early ad-vance in Union Pacific was due also in part to a rumor that a decision in favor of the Union Pacific party was to be handed down in the Northern Securities case, upholding its contention for the re-turn of the Northern Pacific stocks as originally deposited. There was more or originally deposited. There was more or iess divergence in the course of the two stocks, as was the case yesterday and the day before, and this had the effect of repressing operations in the general market, owing to the confusion of sentiment. Dealings fell away to the dullest of the week in the latter part of the day, and prices clung closely to hast night's closing level. Sharp declines in the Metrop-litan group of street railway stocks were also a depressing influence. Southern Pacefie was forced down 11-2 late in the day, but visorous support was offered it, and the market closed steady and generally slightly lower than last night. Bonds were less active than recently, but prices were well sustained. Total sales, par value, 11.75,000. United States bonds were lichanged on call.

Total sales of stocks to-day were 208,-200 shares.

COTTON MARKETS.

NEW YORK, June 17.—The cotton market opened weak at a decline of 3418 points, with the old crop months showing the greatest los es under liquidation and bear pressure following very disappointing English cables and continued favorable weather. The new crop months continued to show relative steadiless the old crop months showing the greatest los cs remeter under liquidation and bear pressure following very disappointing English cables and continued favorable weather. The new cropmonths continued to show relative steadiness during the entire session, being sustained by the covering of a large short interest and buy the covering of a large short interest and buy the covering of a large short interest and buy the covering of a large short interest and buy the covering of a large short interest and buy the covering of a large short interest and buy the covering of a large short interest and buy the covering of a large short interest and buy the covering of a large short interest and buy the covering of a large short interest and buy the covering and covering and of the leafung the covering and of logic points on the new crop months. The old crop positions showed shelp at losses of \$300 boiles and of logic points on the new crop months. The old crop positions showed speak the covering and report of the season, steady in tone, at a net decline of \$300 boiles and of logic points on the new crop months. The old crop positions showed speak sensitiveness during the entire session, selling down and then rallying several points on comparatively light orders. In a general way the selling seemed to come from New Creams and the South, while the Wall Street interest were the buyers.

Total sales of futures were estimated at \$200,000 bnles.

Receipts and 17,481 bast year. To day's receipts as the ports to-day were sellinated at \$200,000 bnles.

Receipts and 17,481 bast year. To day's receipts as the New Orleans were 1,188 bales against 2,333 bales last year, and at Houston 147 bales against 8 last year.

COTTON.

The first bale of new cetton of this season's growth from the Mississippi Valley is to-day reported as having been received at Carenville, Miss. The earliest date at which the first bale has been proviously reported from the Mississippi Valley was July 23d. Last year the first bale was received August 18th. It commenced to look as if this crop was from six weeks to two months cariler than hast year, largely as the result of the use of early maturing seed. It is now only eight days until June 25th, when the government report will be made up, and I shall not be surprised if the indicated condition on June 25th is the highest on record. Some of my correspondents in the South estimate August receipts of new cotton at 150,000 bales. If the yield of the acreage planted this year is equal to the average of the past ten years, the crop will be 12,578,000 bales. The smallest production per acre we have ever had would give us a crop of over 11,000,000 bales. Under these conditions there is no possible reason for buying cotton apparent to me.

I quote the following crop advices reaching me to-day:

East Prairie, Mo., June 15.—The weather has warmed up and cetton is growing

I quote the following crop advices reaching me to-day:

East Prairie, Mo., June 15.—The weather has warmed up and cotton is growing finely. I think we will have blooms by the 4th of July. That is early for this part of the country. Scott county, Mo. about forty miles north of us, has 2,600 acres of cotton this year, where they have not raised any before in fifteen years. My native home is Southern Kentucky, and my advice from there is that they have planted large crops of cotton this year where they have not raised any for twenty years.—F. M. WILKINSON.

Lando, S. C., June 15.—Your remarks in yesterdays' Charlotte, N. C., Observer regarding the probable early movement of cotton in Texas this season have been noted. As bearing upon this question your attention is called to the fact that during November, December and January of the present season hundreds of carloads of cotton seed were shipped from this State and North Carolina to Texas for planting purposes. The earliest varioties were selected it being desired to secure such seed as would mature early before the ravages of the boll weevil became so pronounced. It is the writer's opinion that this fact, together with the favorable conditions of the crop in this immediate vicinity are ideal, and with an increase of from 10 per cent, to 12 per cent. in acreage, and a continuance of favorable conditions a large crop is assured.—H. B. HEATH.

A canvass of the situation in the cotton but here were made for Dun's review by

acreage, and a continuance of favorable conditions a large crop is assured.—H. B. HEATH.

A canvass of the situation in the cotton belt has been made for Dun's review by branch offices of R. G. Dun and Company. Dun's review says: "As the season advances the prospect for a large yield of cotton becomes brighter, and there has appeared less than the customary amount of injury from the elements and insects, while the reports as to the acreage are practically unanimous in showing a material increase. It is especially gratifying to note such unanimity of sanguine indications from Texas, because of the large proportion of the total crop secured in that State. The crop there is decidedly earlier than last year, and weather conditions are all that can be desired. An increase of more than 9 percent. In Texas acreage means a large amount of cotton, provided the condition is maintained. The only drawback is found in the prevalence of boil weevil, and as to this, there is hope of some improvement over last year."

Hallyille, Texas, June 14.—The cotton crop is about three weeks ahead of last year's crop in this section, having very good stands, stalks strong and healthy. Lots of squares. Most too much rain lately, but with a week or ten days of such weather as we have had this week crops will soon be cleam. Acreage increased about 5 per cent. to 10 per cent.; more fertilizers used than usual, and cotton planted on best land. Yield should be good. No weevils in these parts that we know of.—H. J. JONES.

Greenville, N. C., June 15.—The cotton crop through eastern North Carolina in acreage is about 20 per cent. greater than last year. The condition at present is as good as could be asked for. Stands good, fields all clean and free from graviplant good size, and a t present 1 see noffing to prevent a bumper crop for 1001.—ED. H. SHELBURN.

T. A. MeIntyre and Co. have the following from Temple, Texas:

Total Gains in Principal Cities.

(By Associated Press.)

NEW YORK, June 17.—The following table, compiled by Bradstreet, shows the hank clearings at a number of the principle cities for the week ending June 18th, with the percentage of increase and decrease as compared what the corresponding week last year. Sixty-three other cities are included in the totals:

New York, \$1,029,823,807 decrease, 24.5.

Chicago, \$181,039,256, increase, 6.1.

Boston, \$142,558,799; increase, 6.1.

Boston, \$142,558,799; increase, 25.4.
